

LEADERSHIP

STRATEGY

ADVOCACY

UNITY

Industry Leadership and Collaboration

United, coordinated industry bodies will deliver the best outcomes for the wine producers of Australia in Policy, Biosecurity, Tourism and Market Access.

WFA is actively working with all levels of the wine industry, with a particular focus on the grass roots level with wine producers and regional associations, to ensure we deliver the best outcomes for the greater Australian wine industry.

Biosecurity

Minimising the risk of biosecurity incursion through a coordinated industry response.

WFA, with Australian Vignerons provides industry leadership to ensure effective management in biosecurity, safeguarding Australia's wine industry and associated businesses.

Geographical Indications and Grape Variety protection

Increased efforts to protect GI's are a growing threat to wine producers, including the right to produce and label grape variety names in domestic and export markets.

WFA is utilising its international networks to coordinate responses against these efforts and is strongly advocating against these types of restrictions to trade.

Health Labelling

There is strong support from most States and Territory Governments, for a change in policy from the current voluntary system to a Mandatory Health Labelling system. Winemakers will go from having the ability to choose the size, type and location of the warning label, to a stricter, regulated system resulting in additional costs, barriers to trade and added regulatory burdens.

WFA will continue to advocate for alternate solutions to mandatory health labelling to prevent additional costs and red tape to Australian wine businesses.

Market Access

Maximising your global market export opportunities.

WFA will continue to ensure barriers to trade are removed or reduced where applicable, and will continue to actively advocate for fair trade arrangements for all Australian winemakers.

National Alcohol Strategy (NAS)

WFA strongly supports the overall aim of the Draft NAS, focussing on reducing harmful consumption. But WFA disagrees with some of the suggested actions to achieve that aim. In particular, those that rely on population-wide measures e.g. taxation, rather than evidence-driven and targeted solutions.

WFA continues to advocate and encourage the responsible consumption of alcohol, while preventing increased restrictions and regulations on the sale of Australian wine products.
